

Glenn Appleyard, Dean Burgess and Glenn Bounds,

Thanks for your letter received on 12/01/15, it is great to see that you endeavour to have TasWater make all rate payers above the target price, reduced to that target in your Price Determination for water and sewerage from 2015. This is the only fair and just decision to make, as we have been paying too much for too long whilst the top end of town have been paying a lot less. The other area that needs urgent attention is the price per kilolitre, we will be paying 94.74c/kl when others will be paying as little 43.99c/kl, this is also totally unfair, and in 2013/14 they were paying 18.72c/kl, how has this been allowed to happen, now is the time to rectify the problem, it's gone on for too long, we are sick of paying far too much for the very same services that other rate payers have been getting for a cheaper price. I hope you stand by your decision with a firm fist, it will make a lot of people happy.

Kind Regards,
Geoff Kennedy,
Claremont.
