

Dear Mr. Bounds,

Re: Economic Regulator's Proposed Price Changes for TasWater Charges.

It was most encouraging to learn of the Economic Regulator's suggestion to TasWater that it should reduce the bills of those paying above the target tariff prices to the set tariff price as from July 1st next, rather than further down the line.

The task of paying for the state's water reforms has fallen far too heavily on the people of areas like Glenorchy, who have had to pay well above the proposed fixed water charges and more than neighbouring municipalities. If TasWater will accept the recommendation, it will be a step in the right direction.

Yours sincerely,
