Subject: Water and Sewerage Pricing

I wish you to consider the following points prior to making your determination regarding prices.

1. Consumers ability to pay
2. Keep pricing in line with CPI as with wages.
3. Do not reward Government Enterprises that are bereft of commercial accountability with a "Rubber Stamp" of their request for a price rise. This should apply to all Government Enterprises.
4. Look at the Logan Council in Queensland where there are moves to amalgamate several Water Boards due to duplication and in-efficiencies.

Regards

Wally Prokopiec
